How to contribute

CHAPTER 7

Contributing to this documentation

7.1. Where the documentation is

All the documentation is in the repository `duckietown/duckuments`.

The documentation is written as a series of small files in Markdown format. The output is:

- [a publication-quality PDF](#);
- [HTML \(single-page\)](#);
- [HTML \(multiple pages\)](#).

7.2. Editing links

The simplest way to contribute to the documentation is to click any of the “✎” icons next to the headers.

They link to the “edit” page in Github. There, one can make and commit the edits in only a few seconds.

7.3. Comments

In the multiple-page version, each page also includes a comment box powered by a service called Disqus. This provides a way for people to write comments with a very low barrier. (We would periodically remove the comments.)

7.4. Compiling the documentation

TODO: Write instructions - it's “make all” but the dependencies are complicated.

7.5. Deploying the documentation

TODO: Write instructions

CHAPTER 8

Features of the documentation writing system

8.1. Embedded LaTeX

You can use ***LaTeX*** math, environment, and references. For example, take a look at

$$x^2 = \int_0^t f(\tau) \, d\tau$$

or refer to [Proposition 1](#).

Proposition 1. (Proposition example) This is an example proposition.
